Figure 18.2 Types of jade/nephrite ornaments recovered from Sa Huynh burials.

Figure 18.3 Sa Huynh Ornaments found across Southeast Asia.

Figure 18.4 Sa Huynh beads and pendants.

Figure 18.5 Gold objects in Sa Huynh cultural sites.

Figure 19.1 Locality map of sites relating to this chapter. Circle: Distribution sphere of the Sa Huynh culture in Vietnam.

Figure 19.2 Typical jar, lid, and funerary goods of the Sa Huynh culture.

Figure 19.3 Sa Huynh pottery locally called ‘noi’, found at the Sa Huynh and Thach Bich sites; (right) height: 11.0 cm; (left) height: 12.5 cm.

Figure 19.4 A spherical burial jar uncovered from the site of Hoa Diem (Burial No. 07HDH1M6, max diameter: 55–59 cm; height: 42.6 cm).

Figure 19.5 Burial jars (left) and lid (right, a pedestal vessel laid upside down upon the jar) decorated with the impression of a shell edge uncovered from Hoa Diem (Burial No. 07HDH1M14, height of jar: 27.1 cm; height of lid: 23.5 cm).

Figure 19.6 Pottery from Kalanay (7–9), Hoa Diem (4–6), Samui (1–3). Rim diameter: 4. 10.2 cm; 5. 15.0 cm; 6. 20.2 cm. Size unknown; 1–3, 7–9.

Figure 19.7 Funerary accessory pottery vessels found at Hoa Diem (top: height 9.5 cm with rim diameter of 9.4 cm (outer); middle: height 4.7 cm with rim diameter of 12.5 cm; and bottom: height 15.6 cm with rim diameter of 15.1 cm).

Figure 19.8 Extended burial and skull at Hoa Diem 2 (Burial No. 10HD2M1) and inhumation jar burial and skull at Hoa Diem 1 (Burial No. 10HD1H3M4).

Figure 19.9 Neighbor-net tree based on 16 craniometric data sets (symbols: see Table 19.1).

Figure 20.1 Map showing the location of the Lo Gach site.

Figure 20.2 Matting impressions remaining on the clay floor surface at Lo Gach: a. Sample SA3-29; b. Sample SA3-33; c. Sample SA1-70.

Figure 20.3 (a) Schematic diagram showing the construction of plaited matting; (b) Contemporary woven reed floor mat purchased in a market at Tan An, Long An Province in 2014.

Figure 20.4 Location of Neolithic matting sites in the lower Yangzi Valley mentioned in the text.

Figure 21.1 Location of Non Ban Jak in Northeast Thailand.

Figure 21.2 Plan of Non Ban Jak, showing the two areas excavated.
Figure 21.3 The first inkling that residential structures would be found at Non Ban Jak came as white walls and a floor were revealed.

Figure 21.4 The surface of layer 5.2 in the eastern square showing superimposed buildings. A. is the eastern wall of the later structure. B. is the eastern wall of the earlier building, which was laid out on a different orientation. C. is the clay floor bearing what are probably bamboo impressions. D. is a ceramic kiln laid out on the same orientation as the earlier of the two structures. E. is an infant burial cut through the floor, and F. is the kitchen area. In the foreground, one can see the charcoal, ash and burnt daub of the floors and collapsed walls of the earlier building.

Figure 21.5 Layer 2 in the eastern square, showing the mortuary chamber containing the graves of an adult, a child and an infant. A rectangular clay floor can be seen in the distance, cut by a rectangular pit. A lane between two buildings runs north–south on the left of the photograph before turning a right angle.

Figure 21.6 The plan of the western mound excavation showing unit numbers, and the layout of graves and structures during the third mortuary phase.

Figure 21.7 The western square included a wall ending with a large stone against which an infant jar burial had been interred. An adult burial had been cut through the floor and a second lay at right angles to the right. Another infant burial jar is seen in the centre of the image.

Figure 21.8 Domestic activity associated with the houses is seen in the many cooking hearths. In this instance, a set of stones surrounds ash and a broken cooking vessel.

Figure 21.9 Three graves were cut through the clay floor of this walled chamber in the western square.
