

# List of Tables

Table 1.1 The archaeological, chronological, palaeoecological and stratigraphic work undertaken by Jack Golson with Philip Hughes and by Tim Denham under Golson's supervision	7
Table 1.2 Archaeological phases at Kuk Swamp, Wahgi Valley	15
Table 4.1 Altitudinal range of pre-1870 starchy food species in PNG	53
Table 4.2 Altitudinal range of some pre-1870 vegetable species in PNG	54
Table 4.3 Altitudinal range of some pre-1870 fruit species in PNG	55
Table 4.4 Altitudinal range of some pre-1870 edible nut species in PNG	55
Table 5.1 Catchment/swamp area ratios for swamps in the Tari region	70
Table 5.2 Wetland agricultural systems of the New Guinea highlands	72
Table 5.3 Wetland drain dimensions	73
Table 5.4 Sweet potato yields on dryland and wetland	81
Table A6.1 Radiocarbon ages on organic mud from the base of black organic clay and the top of red-brown organic mud	113
Table A6.2 Calibrated ages of wood, charcoal and mud relating to the age of the organic/inorganic transition	114
Table A6.3 Radiocarbon ages on wood or charcoal from the bottom of black organic clay	115
Table A6.4 Radiocarbon ages on cellulose from wood at the top of red-brown organic mud on E-W Rd 1	115
Table 7.1 Stratigraphic characteristics and descriptions of tephtras at Kuk	121
Table 7.2 Chronology of tephtras at Kuk	123
Table 7.3 Compositional characteristics of tephtras at Kuk	129
Table 8.1 Effects of tephtra falls on crops	136
Table 9.T2.1 Summary of age, origin and size of Kuk insect samples	150
Table 9.1 Palaeoecological sites in the Wahgi Valley	154
Table 10.1 Archaeobotanical table listing potential food plants documented from Pleistocene and Holocene contexts at Kuk	168
Table 10.T2.1 Percentage composition of diagnostic <i>Musa</i> and <i>Ensete</i> seed phytoliths in phytolith assemblages	171
Table 10.2 Macrobotanical remains of food plants reported at other archaeological sites in the highlands	179
Table 12.1 Relative inter-site chronology for Phase 2	217
Table 13.1 Radiocarbon dates for Phase 3 features at other wetland sites in the highlands	230
Table 13.2 Inter-site chronology for Phase 3	234

Table 18.1 Wooden tools catalogued by category and provenance	357
Table 20.1 Kuk stones available for analysis	374
Table 20.2 Kuk flake tools	396
Table 20.3 Kuk core tools	397
Table 20.4 Kuk utilised fragments	398
Table 20.5 Kuk grinding and pounding stones	399
Table 20.6 Kuk ground stone implement: Club head fragment from Phase 5	400
Table 20.7 Kuk axes, including axe flakes and fragments	400
Table 21.1 Raw materials for flaked artefacts at Kuk	406
Table 21.2 Grinding artefacts at Kuk	407
Table 21.3 Identification of axes from surface collections in three environments at Kuk	409
Table 21.4 Sources of axe fragments from stratified contexts at Kuk	410
Table 21.5 Summary of Kuk axe sources	415
Table A21.1 Geochemical results for oxides from the mortar rim	419
Table A21.2 Apatite (U-Th)/He dating of the mortar rim fragment	420

This text is taken from *Ten Thousand Years of Cultivation at Kuk Swamp in the Highlands of Papua New Guinea*, edited by Jack Golson, Tim Denham, Philip Hughes, Pamela Swadling and John Muke, published 2017 by ANU Press, The Australian National University, Canberra, Australia.
