

# Figures

Figure I.1 Construction starts of nuclear reactors in the world by year, 1951–2016 . . . . .	2
Figure 2.1 Evolution of costs and duration of construction estimates for the EPR in Flamanville . . . . .	52
Figure 8.1 Increased lifetime cancer risk by age and gender associated with an extra radiation dose of 10 mSv . . . . .	232
Figure 11.1 Global warming potential of greenhouse gases by economic sector over a 100-year time frame . . . . .	320
Figure 11.2 New generation capacity added in 2014 and 2015 by technology type . . . . .	321
Figure 11.3 Schematic of a typical solar cell . . . . .	329
Figure 11.4 Shipments of photovoltaics since 2001 . . . . .	332
Figure 11.5 Wind energy shipments since 2000 . . . . .	335
