Table 1.1: Australian gender gaps at a glance, 2017	3
Table 1.2: Social security and welfare expenditure, 2016–17 (\$billion).	10
Table 1.3: Income tax rates and thresholds, 2016–17	12
Table 2.1: UN GDI, TC version ranks, OECD tax ratios, selected countries, 1995 and 2013/2014	42
Table 2.2: Gini coefficients by income measures and revenue structures, selected countries, 2014	47
Table 2.3: Participation tax rates and child care costs as percentage of earned income for second-earner and lone parents, selected OECD countries, 2012	60
Table 3.1: PIT + LITO marginal tax rate scales, 2015–16	72
Table 3.2a: Change in ATRs and tax burdens from 2013–14 to 2023–24.	75
Table 3.2b: Change in ATRs and tax burdens from 2003–04 to 2013–14.	75
Table 3.3: Tax rates 2015–16: Single income two-child family	82
Table 3.4: Primary income = \$60,000 pa: Tax rates on second income	83
Table 3.5a: Second-earner income, taxes and hours by primary income (SIH 2013–14)	85
Table 3.5b: FTB-A payments by primary income: Two children aged 5 to 18 years.	85
Table 3.6: Life cycle labour supply by gender	88

Table 3.7: Life-cycle median household income, earnings and saving	89
Table 3.8: Second earnings and saving by primary income	89
Table 4.1: Fiscal policy strategies for a human rights framework.	108
Table 5.1: Elasticity of hours worked estimates for households with children in 2002.	139
Table 6.1: ‘Bird’s-eye view’ timeline of Australian wage-transfer tax system	183
Table 7.1: Trade-offs between market time and child care time, youngest child (0–4 years), adjusted.	215
Table 7.2: Trade-offs between market time and child care time, youngest child (5–14 years), adjusted.	215
Table 7.A1: Descriptive summary.	220
Table 8.1: Education by gender, 2014	234
Table 8.2: Returns to education of male workers: OLS estimates, 2001–14	242
Table 8.3: Returns to education of female workers: OLS estimates, 2001–14	242
Table 8.4: Returns to education of male workers by level of education: OLS estimates, 2001–14.	243
Table 8.5: Returns to education of female workers by level of education: OLS estimates, 2001–14.	244
Table 8.6: Returns to education of men and women (in per cent), cross-sectional vs life-cycle model.	248
Table 9.1: Minimum levels of total income, by year, in current \$	265
Table 9.2: Proportion of women in top percentiles (comparative).	266
Table 9.3: Share of total income from wages, all ages	269
Table 9.4: Share of total income from wages, working-age population only	270
Table 9.5: Share of working-age men and women (age 18–64) with no occupation, by gender and income range, 2013–14	273

Table 9.6: Occupations in the top 1 per cent, working-age population, 2013–14	274
Table 9.7: Illustration of tax benefit from income splitting at top incomes	281
Table 9.A1: Working-age women in top 1 per cent, 30 most common occupations, 2013–14	284
Table 9.A2: Working-age men in top 1 per cent, 30 most common occupations, 2013–14	286
Table 9.A3: Men and women in top 1 per cent with no reported occupation	288
Table 9.A4: People in top 1 per cent with an occupation (incl. occupation not listed), by average wage in that occupation . . .	289
Table 10.1: Old age poverty rate: Australia in an international perspective	302
Table 10.2: Gallagher’s modelled outcomes of Australia’s retirement income system	304
Table 10.3: Inequality among older Australian households—ratios of the 90th to the 10th percentile equivalised incomes of Australians aged 65 and over	307
Table 10.4: Inequality among older Australian households—superannuation wealth at the 10th, 50th and 90th percentiles for Australians aged 65 and over, 2013–14	307
