Dedication: Robert George Lesslie ........................................ vii
Foreword ........................................................................... ix
Henry Nix AO
Acknowledgements ............................................................. xi
Contributors .................................................................... xiii
Glossary of Terms ............................................................. xxv
Introduction ........................................................................ 1
Richard Thackway

Part 1 – The Past and Current Situation
1. Australian Land Use Policy and Planning: The Challenges ........................................ 11
   Richard Thackway
2. A Retrospective: The Influence of Rob Lesslie—Landscape Scientist, Geographer and Natural Resources Land Use Planner .......... 17
   Richard Thackway
3. Reprint: Land Use and Management—The Australian Context .................................. 31
   Rob Lesslie and Jodie Mewett
   Stephen Dovers

Part 2 – Ad Hoc or Strategic Responses
5. Addressing a Lost Opportunity: Towards Science-Informed Land Use Planning .................. 71
   Darryl Low Choy
6. Responding to Land Use Pressures: A State and Territory Perspective .......................... 85
   Richard W. Hicks
   Jason Irving

8. The Impacts of Land Use Change on Biodiversity in Australia . . . 115
   John Neldner

Part 3 – Working to Achieve National Coordination

9. National Coordination of Data and Information to Inform Land Use Policies and Programs: The Recent Past, the Present and Ideas for the Future ...................................................... 129
   Richard Thackway

10. Understanding Soil Change: Institutional Requirements to Ensure Australia’s National Preparedness .............. 145
    Neil McKenzie

Part 4 – Social and Natural Drivers of Change

11. Environmental Conflict: Engaging with Scientific Information and Community Activism. ......................................... 169
    Jacki Schirmer

12. The Role and Importance of Coordinated Land Information to Support Landscape Connectivity Initiatives ................. 181
    Gary Howling and Ian Pulsford

13. Monitoring and Reporting Land Use Change and Its Effects on the Queensland Environment ............................. 203
    Paul Lawrence, Craig Shephard, Phillip Norman, Christina Jones and Christian Witte

14. Down Payments on National Environmental Accounts. ............ 217
    Michael Vardon, John Ovington, Valdis Juskevics, John Purcell and Mark Eigenraam

15. Elephants in the Kitchen: Responding to the Challenge of Rapidly Changing Climate and Land Use. .................... 241
    Brendan Mackey

Part 5 – Visions for the Future

    Tim Clancy, Brett A. Bryan and Siddeswara M. Guru

17. Land Use Planning as a Collective Learning Spiral: The Case of Regenerative Landscape Policy and Practice ............. 263
    Richard Thackway, Valerie A. Brown, David Marsh and John A. Harris

Appendix: Index of publications by Dr Rob Lesslie .................... 279
