

# List of Tables

Table 2.1 Summary of catchment areas, dam areas and percentage of each catchment denuded by flooding.	30
Table 5.1 Site data variables and attributes.	83
Table 5.2 Shelter data variables and attributes.	84
Table 5.3 Mark data variables and attributes.	84
Table 6.1 Number and percentage of site contexts (open or shelter) by river catchment (compiled from IPG/DB and R/DB).	87
Table 6.2 Summary description of sites with engraved groove channels (description as per IPG Site Cards).	93
Table 6.3 Description of engraved rock art in open contexts (per IPG Site Cards).	95
Table 6.4 Summary of archaeological traits per shelter in the Upper Nepean catchment (IPG/DB and R/DB).	100
Table 6.5 Summary statistics relating to shelter contexts with rock art marks per catchment (IPG/DB and R/DB).	101
Table 6.6 Data on number and percentage of the main rock art categories in each catchment (IPG/DB and R/DB).	104
Table 6.7 Numbers of morphological types and other shelter characteristics (n = 110: R/DB).	105
Table 6.8 Numbers of locations and visibility characteristics of rock marks (R/DB).	105
Table 7.1 McCarthy's Sydney–Hawkesbury shelter art sequence.	110
Table 7.2 Sefton's superimposition sequence in the Georges/Woronora and Cataract rivers area.	111
Table 7.3 Relative chronology for the Mangrove Creek Art Sequence produced by McDonald (1994). Note text in italics denotes changes made by McDonald (2008a).	113
Table 7.4 Numbers of superimposed relationships per pigment colour and technique (IPG/DB).	117
Table 7.5 Numbers of marks in superimposed relationships by mark type and pigment colour (R/DB).	119
Table 7.6 Sequential position of the motifs in superimpositions of three or more (1 = first in sequence, 2 = second, and so on) (R/DB).	120
Table 7.7 Comparison of recorded superimposition relationships between the Research Database and the IPG Database.	122
Table 7.8 Temporal sequence of sheltered art based on colour and technique.	123
Table 8.1 Description of shelters with small intaglio engravings in the Upper Nepean and adjacent environs (IPG/DB).	132
Table 8.2 Numbers of Phase 2 rock art types (R/DB and IPG/DB).	135

Table 8.3 Comparison of Phase 2 stencil density with all shelter sites and motif densities (IPG/DB and R/DB).	137
Table 8.4 Frequency distribution of the micro-topographic location of Phase 2 stencil rock art (R/DB).	142
Table 8.5 Frequency distribution of the micro-topographic location of Phase 2 graphic rock art (R/DB).	143
Table 8.6 Locational data for Phase 2 graphics as per figurative referent (R/DB).	143
Table 8.7 Counts of Phase 2 motif categories based on model/referent per catchment (R/DB and IPG/DB).	144
Table 8.8 Phase 2 graphic diversity (R/DB).	145
Table 8.9 Numbers of Phase 3 rock art types (R/DB and IPG/DB).	149
Table 8.10 Distribution of shelters and stencil counts of Phase 3 white/cream stencils per catchment (R/DB and IPG/DB).	151
Table 8.11 Frequency distribution of the micro-topographic location of Phase 2 and 3 stencils (R/DB).	156
Table 8.12 Cross-tabulation of Phase 3 non-graphic gestural marks and location (R/DB).	156
Table 8.13 Frequency distribution of the micro-topographic location of Phase 2 and 3 graphics (R/DB).	157
Table 8.14 List of Phase 3 figurative graphics per catchment (R/DB and IPG/DB); new figurative categories italicised.	160
Table 8.15 Summary of temporal change in the rock art of the Upper Nepean catchment.	170

This text is taken from *Drawing in the Land: Rock Art in the Upper Nepean, Sydney Basin, New South Wales*, by Julie Dibden, published 2019 by ANU Press, The Australian National University, Canberra, Australia.
