The Centre for Science in Society at Victoria University of Wellington funds an editorial assistant. The Centre for Environmental History at The Australian National University supports the journal, and ANU Press publishes an open-access electronic version and a print-on-demand hard copy of the journal.

Our open-access policy means that articles will be available free to scholars around the world, ensuring high citation rates and impact in and beyond the field of history.

About the Journal

International Review of Environmental History takes an interdisciplinary and global approach to environmental history. It publishes on all thematic and geographical topics of environmental history, but especially encourages articles with perspectives focused on or developed from the southern hemisphere and the 'global south'. This includes but is not limited to Australasia, East and South East Asia, Africa and South America.

International Review of Environmental History's editorial board includes historians, scientists and geographers, as well as scholars from other backgrounds, who work on environmental history and related disciplines, such as ecology, garden history and landscape studies. The methodological breadth of *International Review of Environmental History* distinguishes it from other environmental history journals, as does its attempt to draw together cognate research areas in garden history and landscape studies.

The journal's goal is to be read across disciplines, not just within history. We encourage scholars to think big and to tackle the challenges of writing environmental histories across different methodologies, nations and timescales. We embrace interdisciplinary, comparative and transnational methods, while still recognising the importance of locality in understanding these global processes.

The Editor of *International Review of Environmental History* is happy to consider future special issues focusing on themes drawn from conferences or collaborations.

Submission Details

Please send article submissions or abstracts between October 2021 and February 2022 to the Acting Editor, Associate Professor Brett Bennett, University of Western Sydney; University of Johannesburg.
Email: brett.bennett.uws@gmail.com

Abstracts should be no more than 200 words, and include a list of keywords. Articles should be in the range 5,000 to 8,000 words (including footnotes), although longer submissions may be considered after consultation with the Editor.

Style and referencing: please use footnotes in Chicago style, and follow Australian spelling. For more details on Chicago style, please see: www.chicagomanualofstyle.org/tools_citationguide.html

The journal also accepts letters and short 'think pieces'. Please contact the Editor for further information.
