Figures

2.1 Contributions to fixed investment growth ........................................ 10
2.2 Various measures of Chinese inflation ........................................... 12
2.3 The real estate sector: starts, sales and completions .......................... 14
2.4 Housing and auto sales ................................................................. 15
2.5 5000 enterprises survey: domestic and foreign order books ............... 16
2.6 Policy stance, lending standards and lending rates ............................ 17
2.7 Contributions to fixed investment growth ........................................ 17
2.8 Housing sales and starts ................................................................. 19
2.9 Decomposition of annual changes in the real exchange rate ............... 22
2.10 Food prices and the nominal exchange rate ..................................... 24
4.1 Net international investment positions and net long foreign exchange
    position proxy .............................................................................. 47
4.2 Ratio of foreign exchange turnover to trade in relation to GDP per capita,
    April 2010 ................................................................................. 49
4.3 Misalignment via linear trends, real exchange rate (trade weighted) .... 57
4.4 Actual and predicted RMB values .................................................... 58
4.5 Actual and predicted RMB values based on 2010 vintage data .......... 59
4.6 Nominal effective exchange rates of the RMB and US dollar (2005 = 100) . 61
4.7 Nominal effective exchange rate for the Chinese RMB index (2005 = 100) . 61
5.1 Share of processing trade in China’s total exports ............................. 73
7.1 Chinese ODI flows (ODIF), 1982–2009 ............................................. 101
7.2 Chinese ODI flow in manufacturing, amount and share (of total non-financial ODI), 2003–09 ................................................. 102
8.1 China’s future oil supply: domestic versus imported ....................... 123
8.2 China’s crude-oil imports by region, 2010 ..................................... 127
9.1 World average per capita GDP and per capita accumulative carbon
dioxide emissions ............................................................................. 140
10.1 US GDP Growth 2007-2010 .......................................................... 151
10.2 US Stock Market (DJIA) .......................................................... 152
10.3 US Unemployment Rate .......................................................... 152
10.4 US Housing Prices (Case Shiller Index) .............................. 153
10.5 US Budget Deficits and Public Debt (%GDP), 2009-2020 ...... 154
10.6 Trade Weighted US dollar ....................................................... 155
10.7 China GDP growth rates, 2007-2011 .................................. 156
10.8 China Trade (Billions of $US), 2001-2010 ........................ 156
10.9 China Inflation Rate (% growth in CPI), 2000-2011 .............. 157
10.10 China-US Trade and Treasurys ($US billions), 2001-2010 .... 158
10.11 US Trade Deficits ($US billions), 2000-2010 .................... 160
10.12 China Trade Surplus ($US billions), 2001-2010 ............... 161
10.13 Foreign Holdings of US Treasury Bills ($US billions, 2001-2010) ... 161
10.15 The iPhone supply and distribution chain ....................... 166
10.16 General Motors sales, 2003-2010 ....................................... 167
12.1 Shares of Australian exports to the top-five destinations, 1994–2009 182
12.2 Shares of Australian imports from the top-five origins, 1994–2009 182
13.1 Global development finance .............................................. 204
13.2 Years of new aid commitments, China to Africa, 1960–2007 .. 209
13.3 Official development assistance to Africa, 2008 ............... 211
14.1 GDP per capita (PPP$) ......................................................... 224
14.2 China’s energy use relative to India ..................................... 225
14.3 Working-age population per person .................................. 226
14.4 GDP per worker (PPP$) .................................................... 230
14.5 Capital accumulation in the Solow–Swan model ................. 231
14.6 Gross fixed investment as a fraction of GDP (per cent) ........ 232
14.7a School completion rates in India ................................. 233
14.7b School completion rates in China ............................... 234
14.8 Human capital indicators .................................................. 235
14.9 Simulation results .......................................................... 237
15.1 Comparison between migrants in rural and urban surveys: China .... 252
15.2a Occupational distribution of migrants and urban incumbents: China . 253
15.2b Occupational distribution of migrants and urban incumbents: Indonesia . 253
15.3 Predicted probability of migration: China ................................ 262
16.2 Changes in the total fertility rate, 1950–2010 ........................... 287
16.3 Changes in the dependency ratio, 1950–2010 ........................... 288
16.4 Changes in the proportion of people over age 65, 1950–2010 .......... 288
16.5 Changes in the dependency ratio, 2000–50 ............................. 291
16.6 Changes in the proportion of people over age 65, 2000–50 ............ 291
17.1 Share of the elderly and old-age dependency in years with a census .... 303
17.2 Various fertility levels for women of childbearing age .................. 305
17.3 Consumption and income with age increase ............................ 307
17.4 Food and work-related consumption over the life cycle ............... 307
17.5 Housing and out-of-pocket medical spending ........................... 308
