

List of tables

| | | |
|------------|--|-----|
| Table 2.1 | Movement propensities according to select social, economic and geographic characteristics, 2002 and 2008 | 21 |
| Table 2.2 | Current duration by previous duration of stay, 2008 | 28 |
| Table 2.3 | Percentage distribution of chronic movers and long term stayers by reasons for moving, labour force status and housing tenure, 2008 | 29 |
| Table 4.1 | High risk alcohol consumption, estimated Indigenous and non-Indigenous populations, Australia, 2007–08 | 54 |
| Table 4.2 | High risk alcohol consumption, all ages, Indigenous and non-Indigenous populations, Australia, 2007–08 | 55 |
| Table 4.3 | Death rates from alcoholic liver cirrhosis and alcohol dependence, Indigenous and non-Indigenous population, Australia, 2000–06 | 55 |
| Table 4.4 | Deaths from alcoholic liver cirrhosis and alcohol dependence, by Indigenous status and gender (Poisson regression modelling), Australia, 2000–06 | 56 |
| Table 4A.1 | Deaths from wholly alcohol attributable conditions (Poisson regression modelling), Australia, 2000–06 | 62 |
| Table 5.1 | Explanatory variables assumed to be associated with self-assessed health, Indigenous Australians, 2008 | 70 |
| Table 5.2 | Factors associated with self-assessed health, Indigenous Australians, 2008 | 71 |
| Table 6.1 | Proportion of Indigenous children with selected health/development problems, Australia, 2008 | 90 |
| Table 6.2 | Summary of selected developmental prompts, facilitators and constraints of Indigenous child development, by remoteness, Australia, 2008 | 93 |
| Table 7.1 | Association between education and measures of wellbeing, Indigenous males, Australia, 2008 | 110 |
| Table 7.2 | Association between education and measures of wellbeing, Indigenous females, Australia, 2008 | 112 |
| Table 7.3 | Factors associated with an index of student happiness, by Indigenous status, Australia, 2006 | 117 |
| Table 7.4 | Proposed National Closing the Gap Survey | 120 |

| | | |
|------------|---|-----|
| Table 8.1 | Labour force status of Indigenous working-age men and women in 2002 and 2008 by selected characteristics | 128 |
| Table 8.2 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age men (odds ratios) | 135 |
| Table 8.3 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age women (odds ratios) | 136 |
| Table 8.4 | Marginal effects of education in non-remote and remote areas: Comparing 2002 and 2008 estimates | 144 |
| Table 8A.1 | Summary statistics on regression variables for labour force status (means/proportions and standard deviations) | 148 |
| Table 8A.2 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age men (marginal effects) | 149 |
| Table 8A.3 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age women (marginal effects) | 151 |
| Table 8A.4 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age men, non-remote locations (marginal effects) | 153 |
| Table 8A.5 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age women, non-remote locations (marginal effects) | 155 |
| Table 8A.6 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age men, remote locations (marginal effects) | 157 |
| Table 8A.7 | Multinomial logit regression estimates on the determinants of labour force status for Indigenous working-age women, remote locations (marginal effects) | 159 |
| Table 9.1 | Indigenous population (%) who participated in selected activities: By demographic, geographic and employment characteristics, Australia, 2008 | 172 |
| Table 9.2 | Factors associated with the probability of participating in harvesting activities in the last 12 months, by remoteness classification, Australia, 2008 | 175 |

| | | |
|-------------|---|-----|
| Table 9.3 | Factors associated with the probability of participating in Aboriginal or Torres Strait Islander cultural activities in the last 12 months, by remoteness classification, Australia, 2008 | 176 |
| Table 9.4 | Reasons for participating in selected activities, by remoteness, Australia, 2008 | 178 |
| Table 9.5 | Percentage of population who participated in selected activities, by health and wellbeing, Australia, 2008 | 180 |
| Table 10.1 | Factors associated with cash problems in the last 12 months, Australia, 2008 | 209 |
| Table 10.2 | Ability to raise \$2000 cash within a week, Australia, 2008 | 210 |
| Table 10A.1 | Descriptive statistics for GSS regressions | 217 |
| Table 10A.2 | Descriptive statistics for NATSISS regressions | 218 |
| Table 11.1a | Frequencies for the non-remote sample, Indigenous Australia, 2008 | 230 |
| Table 11.1b | Frequencies for the remote sample, Indigenous Australia, 2008 | 231 |
| Table 11.2 | Victimisation rates by area, Indigenous Australia, 2008 | 232 |
| Table 11.3a | Logistic models for the non-remote sample | 233 |
| Table 11.3b | Logistic models for the remote sample | 234 |
| Table 11.4 | Marginal effects for selected variables for non-remote and remote area models | 235 |
| Table 12.1 | Indigenous housing utilisation by ASGC Remoteness Area, Australia, 2008 | 245 |
| Table 12.2 | Indigenous housing utilisation by household composition, Australia, 2008 | 245 |
| Table 12.3 | Indigenous household utilisation by household type, Australia, 2008 | 246 |
| Table 12.4 | Logistic regression model of Indigenous crowding | 247 |
| Table 12.5 | Summary of bedroom sharing criteria from the CNOS, 1991 | 248 |
| Table 12.6 | Models of 'crowding' utilised by various governments | 249 |
| Table 12.7 | Proportion of Indigenous households living in 'overcrowded' conditions, by number of bedrooms, State and Territory, Australia, 2008 | 250 |

| | | |
|-------------|--|-----|
| Table 12.8 | Proportion of Indigenous households living in 'overcrowded' conditions by type of location, State and Territory, Australia, 2008 | 251 |
| Table 12.9 | Categories of homelessness employed by ABS | 253 |
| Table 12.10 | Average numbers of adults and children sleeping in the <i>jilimi</i> per night as sampled over 221 nights, 1998–2001 | 260 |
| Table 12.11 | Types of residents in <i>jilimi</i> over the 221 nights, 1998–2001 | 260 |
| Table 12.12 | Analysis of current policy terms, household enumeration, Australia | 269 |
| Table 13.1 | Rotated factor pattern, cultural variables, Indigenous Australia, 2008 | 287 |
| Table 13.2 | Standardised cultural factor scores: Mean score for Indigenous people in remote and non-remote areas, Indigenous Australia, 2008 | 288 |
| Table 13.3 | Wellbeing indicators: Regression results, Indigenous Australia, 2008 | 291 |
| Table 13.4 | Psychological stress: Logistic regression results controlling for discrimination, Indigenous people living in non-remote areas (odds ratios), Indigenous Australia, 2008 | 297 |
| Table 13A.1 | Cultural variables included in exploratory factor analysis and weighted means, Indigenous Australia, 2008 | 301 |
| Table 13A.2 | Logistic regression models for 'mainstream' outcomes (odds ratios), Indigenous Australia, 2008 | 302 |
