## CHAPTER 2 — Kaleidoscope of Contradictions

1. 势 has numerous content-dependent meanings in legalist political philosophy, such as 权势/威势 (authority, power), 主权 (sovereignty), 势力 (power, leverage), 优势 (vantage) and 形势 (timing, situation, position). I have used the term 'power' to encapsulate the central idea of 势 as being front and centre of the legalist political philosophy.

6. The often-extreme difficulty of accurately gauging the considered views of the PRC's leadership means Beijing's military risk calculus over the Taiwan Strait is challenging, if not impossible, to measure. See, for example, Alice Miller, 'Valedictory: Analyzing the Chinese Leadership in an Era of Sex, Money, and Power', *China Leadership Monitor*, no.57 (Fall 2018),

online at: https://www.hoover.org/research/valedictory-analyzing-chinese-leadership-era-sex-money-and-power. However, a range of factors suggests Beijing will probably err on the side of escalating grey-zone tactics short of war and will seek to avoid initiating large-scale military conflict in the Taiwan Strait. These factors include the enduring uncertainty regarding the levels of US and allied resolve to respond to any PRC use of military force and the high levels of domestic and international risk for Beijing should its use of military force not achieve its stated objectives.
