Figure 2.1 GDP real growth rate and unskilled wage real growth rate. . . . .	27
Figure 2.2 Trade and current account balances. . . . .	29
Figure 2.3 Consumption and investment share of GDP . . . . .	31
Figure 2.4 Composition of GDP (per cent). . . . .	31
Figure 2.5 Contributions of components of GDP growth. . . . .	33
Figure 2.6 Gini coefficient in China. . . . .	36
Figure 2.7 Steel consumption in China compared with other countries. . . . .	38
Figure 2.8 Coal consumption in China compared with other countries . . . . .	39
Figure 3.1 Comparison of population dependency ratio changes in selected countries. . . . .	45
Figure 3.2 Age structures of <i>hukou</i> residents and migrants in urban areas, 2010 . . . . .	50
Figure 3.3 Population and education by age: Migrant and urban local workers . . . . .	51
Figure 3.4 Estimates of actual labourers by sector. . . . .	53
Figure 3.5 Changing trends of youth and outbound migrant workers in rural areas . . . . .	58
Figure 4.1 Simulating the growth effect of the consumption rate . . . . .	73
Figure 4.2 Trends of the savings rate, investment rate and consumption rate, 2000–14 (per cent) . . . . .	75
Figure 4.3 The downward trend of the utilisation rate of industrial capacity, 1978–2013 (per cent) . . . . .	76
Figure 4.4 Future economic growth: Three scenarios (RMB trillion, 2014 constant price). . . . .	84
Figure 5.1 ‘Cross-subsidisation’ in Chinese industry: An exploratory flow chart . . . . .	91
Figure 5.2 TFP growth in China: An APPF approach . . . . .	102
Figure 6.1 IFDI: Aggregated and by subsector, 2014–15 . . . . .	119
Figure 6.2 IFDI: Provincial subindices and growth, 2014–15 . . . . .	119
Figure 6.3 IFDI: Subindices by prefecture-level cities, December 2015 . . . . .	120
Figure 6.4 IFDI: Growth of subindices by prefecture-level cities, 2014–15 . . . . .	120

Figure 6.5 Relationship between traditional finance and IFDI at the prefecture level. . . . .	121
Figure 6.6 Prefecture-level relationship between mobile phone penetration and IFDI . . . . .	122
Figure 6.7 IFDI: Subindices by age group, December 2015 . . . . .	122
Figure 6.8 Flow chart for Ant Financial online lending. . . . .	125
Figure 6.9 Comparison of P2P composite interest rates with others . . . . .	128
Figure 6.10 Average number of operating days of normal platforms and problematic platforms . . . . .	130
Figure 6.11a Regional distribution of all problematic P2P platforms. . . . .	131
Figure 6.11b Regional distribution of proportions of problematic platforms . . . . .	131
Figure 6.12 Survival probability and registered capital . . . . .	132
Figure 6.13 Survival probabilities for platforms with interest rates lower or higher than 8 per cent . . . . .	133
Figure 8.1 Comparison of annual per capita expenditure: Rural and migrants. . . . .	161
Figure 8.2 Comparison of detailed consumption items: Rural and migrants. . . . .	161
Figure 8.3 Consumption and saving by income, 2008–14 . . . . .	168
Figure 8.4 Consumption components for bottom and top income groups, 2008–14 . . . . .	169
Figure 8.5 Price indices, 2008–14 . . . . .	170
Figure 8.6 Saving components for bottom and top income groups, 2008–14 . . . . .	170
Figure 8.7 Migration duration and consumption . . . . .	183
Figure 8.8 Semiparametric relationship between income and consumption and saving . . . . .	184
Figure 9.1 The stock of China's ODI expands rapidly . . . . .	198
Figure 9.2 Global FDI strongly attracted to good rule of law. . . . .	201
Figure 9.3 Chinese ODI uncorrelated with rule of law . . . . .	202
Figure 9.4 China is the most closed of the BRICS countries (FDI restrictiveness index, 2014). . . . .	208

Figure 10.1 Share of population aged 65 years and older, 2014 . . . . .	216
Figure 10.2 Population ageing share and income per capita, 2014 . . . . .	217
Figure 10.3 Total, child and elderly dependency ratios, China . . . . .	220
Figure 10.4 Years taken for ageing share to increase from 7 to 14 per cent of population . . . . .	221
Figure 10.5 Average total years of secondary schooling, age 15+, total, in China compared with countries that were PO before RO . . . . .	230
Figure 10.6 Average total years of secondary schooling, age 15+, total, in China compared with countries remaining in a PO state . . . . .	230
Figure 10.7 High-tech exports as a percentage of manufactured exports in China compared with countries that were PO before RO and OECD average . . . . .	231
Figure 10.8 Research and development expenditure as a percentage of GDP in China compared with countries that were PO before RO and OECD average . . . . .	232
Figure 11.1 Time series of the price index (left axis) and dividend yield (right axis) of the Shanghai A-share stock market . . . . .	259
Figure 11.2 Price–dividend ratio of the Shanghai A-share market . . . . .	260
Figure 11.3 Date-stamping bubble periods in the Shanghai A-share modified price–dividend ratio: The SADF test . . . . .	261
Figure 11.4 Date-stamping bubble periods in the Shanghai A-share modified price–dividend ratio: The GSADF test . . . . .	262
Figure 12.1 China: Ratio of debt to GDP by sector . . . . .	274
Figure 12.2 Emerging Asia non-financial corporate debt (foreign currency denominated, percentage of total), 2014 . . . . .	275
Figure 12.3 China: Liabilities by industry (ratio to EBIT) . . . . .	277
Figure 12.4 China: Corporate leverage by industry and ownership/control (ratio of liabilities to assets). . . . .	278
Figure 12.5 China: Return on assets by industry (profit, relative to assets) . .	279
Figure 12.6 China: Annual growth of liabilities and debt . . . . .	281
Figure 12.7 China: Liabilities and debt (ratio to EBIT, non-financial listed companies) . . . . .	282
Figure 12.8 China: Liabilities-to-assets ratio of non-financial listed companies . . . . .	283

Figure 12.9 China: Debt-to-assets ratio of non-financial listed companies . . .	284
Figure 12.10 China: Composition of liabilities by ownership/control (share of total liabilities) . . . . .	285
Figure 12.11 China: Composition of liabilities by industry (share of total liabilities) . . . . .	286
Figure 12.12 China: Leverage of non-financial listed companies by industry (ratio of liabilities to assets). . . . .	287
Figure 12.13 China: Measures of non-financial listed company leverage . . .	288
Figure 12.14 China: Return on assets of non-financial listed companies (net profit, ratio to assets, per cent) . . . . .	289
Figure 13.1 An indicator for the performance of cities in the 'low-carbon city' program . . . . .	319
Figure 14.1 Changing profit margins of CISA members versus iron ore prices, 1999–2015 (per cent and US\$/t) . . . . .	344
Figure 14.2 CISA members' cost rates, 2015 (cost of sales over total sales) . .	346
Figure 14.3 Sales margin versus proportion of state-owned capital, 2015 (per cent) . . . . .	349
Figure 14.4 Comparison of SOE and private enterprise steel production, 2000–15 (million tonnes) . . . . .	351
Figure 14.5 Concentration ratio of the steel industry, 2005–15 (per cent) . .	353
Figure 14.6 Apparent steel use per capita of major economies, 1991–2014 (kg per person) . . . . .	354
Figure 15.1 Relationships between national water use and energy consumption, 2000–14 . . . . .	360
Figure 15.2 Decomposition results for changes in industrial freshwater withdrawals, 2002–12. . . . .	367
Figure 15.3 Decomposition results for changes in industrial energy consumption, 2002–12 . . . . .	367
Figure 15.4a Degree of contribution of individual industrial sectors to the resource intensity effect . . . . .	369
Figure 15.4b Degree of contribution of individual industrial sectors to the economic growth effect . . . . .	369
Figure 18.1 Chinese GDP growth rates, 2000–15. . . . .	422
Figure 18.2 Growth rates in Chinese energy intensity of GDP, 2006–15 . . .	422

Figure 18.3 Chinese PEC growth rates, 2000–15 . . . . .	423
Figure 18.4 Electricity generation capacity in China by source . . . . .	431
Figure 18.5 Total PEC by source . . . . .	431
Figure 19.1 Power installed capacity mix in China . . . . .	450
Figure 19.2 China's power generation mix . . . . .	450
Figure 19.3 Carbon dioxide emissions of various sectors in China. . . . .	451
Figure 19.4 Pollutant emissions from China's thermal power generation and their proportion in total industrial emissions. . . . .	452
Figure 19.5 Comparison of sulphur dioxide and nitrogen oxide emissions from Chinese and American power industries, 1998–2014 . . . . .	453
Figure 19.6 Comparison of carbon dioxide emissions from Chinese and American power industries, 1998–2014 . . . . .	453
Figure 19.7 Additional power capacity added each year in China . . . . .	461
Figure 19.8 Change in size of thermal power generating units . . . . .	463
Figure 19.9 Sulphur dioxide emissions from the thermal electric power industry in China . . . . .	464
Figure 19.10 Region and size distribution of sampled power plants . . . . .	468
Figure 20.1 Evolution of urban density, 2007–11 . . . . .	489
Figure 20.2 City size and urban density, 2007–11 . . . . .	489
