

# Figures

Figure 1 Structure and relations of the database used to manage species records . . . . .	18
Figure 2 Seasonal variation in the number of temporal records (unique sampling dates) within the study region ( $n = 4,603$ ) . . . . .	24
Figure 3 A species accumulation curve fitted to the number of new taxa discovered since 1970 . . . . .	31
Figure 4 Temporal distribution of species richness in the study region . . . . .	41
Figure 5 Seasonal variation in adult abundance of butterflies and diurnal moths in the study region, showing examples of species peaking at different times of the year . . . . .	43
