

# Maps

Map 1 Location of the study region in northern Australia . . . . .	6
Map 2 Map of the study region showing spatial variation in average annual precipitation . . . . .	6
Map 3 Map of the study region showing the extent and land tenure of the National Reserve System. . . . .	11
Map 4 Geographical distribution of spatial records (unique sampling sites) within the study region ( $n = 4,352$ ). . . . .	18
Map 5 Seasonal rainfall zones of northern Australia . . . . .	21
Map 6 Example of the method used to estimate geographic range: <i>Delias argenthona</i> , a species with a continuous distribution, as inferred from distribution records and larval food plant data . . . . .	21
Map 7 Example of the method used to estimate geographic range: <i>Taractrocera ilia</i> , a narrow-range endemic restricted to the Arnhem Land Plateau. . . . .	21
Map 8 Example of the method used to estimate geographic range: <i>Delias aestiva</i> , a species normally restricted to coastal habitats (mangrove), but with two inland non-breeding records (vagrants) . . . . .	21
Map 9 Geographic ranges of butterflies and diurnal moths in the study region, showing examples of species. . . . .	36
Map 10 Geographic ranges of butterflies and diurnal moths in the study region, showing examples of species. . . . .	37

This text is taken from *Atlas of Butterflies and Diurnal Moths in the Monsoon Tropics of Northern Australia*, by M.F. Braby, D.C. Franklin, D.E. Bisa, M.R. Williams, A.A.E. Williams, C.L. Bishop and R.A.M. Coppen, published 2018 by ANU Press, The Australian National University, Canberra, Australia.
