

Contributors to this Issue

Thomas J. Burns is professor of sociology at the University of Oklahoma, and is active in the religious studies and environmental studies programs and the Center for Social Justice there. He serves as book review editor of *Human Ecology Review*, as a member of the Editorial Board of *The Journal of World-Systems Research*, and has served on the Executive Board of the Society for Human Ecology. He is recipient of the Society for Human Ecology's Distinguished Leadership Award.

Carolyn Coburn is a PhD candidate in sociology at State University of New York at Stony Brook. Her research areas are development, political economy, and environmental sociology. She has published previously in the sociology of development and social science research.

Thomas Dietz is professor of environmental science and policy (ESPP), sociology and animal studies at Michigan State University, where he was founding director of ESPP. He holds a PhD in ecology from Kent State University and a BGS from Kent State University. His research focuses on structural human ecology and environmental decision making. He has served as president of the Society for Human Ecology (SHE) and has won the Gerald R. Young Book Award from SHE and the Sustainability Science Award from the Ecological Society of America.

Jared Fitzgerald is a sociology PhD student at Boston College. His research interests include political economy and global environmental change.

Jennifer E. Givens is an assistant professor in the Department of Sociology at Washington State University. Her comparative international research focuses on environmental sociology, global inequality, and development. Her work has been published in *Social Science Research*, *International Journal of Sociology*, and *Organization & Environment*.

Xiaorui Huang is a sociology PhD student at Boston College. His research interests include environmental sociology, political economy, and comparative-historical sociology.

Andrew K. Jorgenson is professor of sociology and environmental studies at Boston College. He is 2015–16 chair-elect of the Section on Environment and Technology of the American Sociological Association, a 2016 Distinguished Scholar-Lecturer at the National Socio-Environmental Synthesis Center, and co-editor of the journal *Sociology of Development*, published by University of California Press. His research focuses on the political economy and human ecology of global environmental change.

Stefano B. Longo is an assistant professor of sociology at North Carolina State University. His research examines the interactions between social and ecological systems. He is the lead author of the book *The Tragedy of the Commodity: Oceans, Fisheries, and Aquaculture*, published by Rutgers University Press.

Sandy Marquart-Pyatt is associate professor of sociology and environmental science and policy at Michigan State University. Her research examines interrelations among environmental issues, outlooks and concerns, and sustainability, and includes both macro-comparative and micro-level work. She is also a quantitative modeler with expertise in analytical techniques including structural equation modeling and hierarchical linear modeling.

Michael Restivo is an assistant professor of sociology at the State University of New York at Geneseo. His work focuses broadly on national and global disparities in health, technology, and environment. His research uses quantitative, longitudinal methods to study health concerns such as maternal mortality from a macro comparative perspective.

Tom Rudel studies the social dimensions of landscape changes in the Americas, both North and South. His research has focused on metropolitan expansion in the United States and forest losses in the Ecuadorian Amazon. He is a distinguished professor in the Departments of Human Ecology and Sociology at Rutgers University.

Juliet B. Schor is professor of sociology at Boston College. She works on issues of sustainable consumption, time-use and new economics. Her most recent book is *Plenitude: The New Economics of True Wealth*.

John M. Shandra is an associate professor of sociology at the State University of New York at Stony Brook. His research focuses on health and environment in a cross-national context.

Jamie M. Sommer is currently a doctoral candidate in sociology at Stony Brook. Her research interests include political economy, environmental sociology, and health.

Richard York is director and professor of environmental studies and professor of sociology at the University of Oregon. He was the Chair of the Environment and Technology Section of the American Sociological Association in 2013–14 and the Friends of the Institute for Advanced Study (IAS) Member of the School of Social Science at the IAS in 2013–14.
