Evans, Denis J.
Statistical mechanics of nonequilibrium liquids.

2nd ed.
Includes index.
ISBN 9781921313226 (pbk.)
ISBN 9781921313233 (online)

1. Statistical mechanics. 2. Kinetic theory of liquids. I.
Morriss, Gary P. (Gary Phillip). II. Title.

Contents

Preface	ix
Biographies	xi
List of Symbols	xiii
1. Introduction	1
References	10
2. Linear Irreversible Thermodynamics	11
2.1 The Conservation Equations	11
2.2 Entropy Production	17
2.3 Curie's Theorem	20
2.4 Non-Markovian Constitutive Relations: Viscoelasticity	27
References	32
3. The Microscopic Connection	33
3.1 Classical Mechanics	33
3.2 Phase Space	42
3.3 Distribution Functions and the Liouville Equation	43
3.4 Ergodicity, Mixing and Lyapunov Exponents	51
3.5 Equilibrium Time Correlation Functions	56
3.6 Operator Identities	59
3.7 The Irving-Kirkwood Procedure	63
3.8 Instantaneous Microscopic Representation of Fluxes	69
3.9 The Kinetic Temperature	73
References	74
4. The Green Kubo Relations	77
4.1 The Langevin Equation	77
4.2 Mori-Zwanzig Theory	80
4.3 Shear Viscosity	84
4.4 Green-Kubo Relations for Navier-Stokes Transport Coefficients	89
References	92
5. Linear Response Theory	93
5.1 Adiabatic Linear Response Theory	93
5.2 Thermostats and Equilibrium Distribution Functions	98
5.3 Isothermal Linear Response Theory	108
5.4 The Equivalence of Thermostatted Linear Responses	112
References	115
6. Computer Simulation Algorithms	117
6.1 Introduction	117

6.2 Self Diffusion	124
6.3 Couette Flow and Shear Viscosity	128
6.4 Thermostatting Shear Flows	142
6.5 Thermal Conductivity	145
6.6 Norton Ensemble Methods	148
6.7 Constant-Pressure Ensembles	152
6.8 Constant Stress Ensemble	155
References	163
7. Nonlinear Response Theory	167
7.1 Kubo's Form for the Nonlinear Response	167
7.2 Kawasaki Distribution Function	168
7.3 The Transient Time Correlation Function Formalism	172
7.4 Trajectory Mappings	176
7.5. Numerical Results for the Transient Time-Correlation Function	183
7.6. Differential Response Functions	188
7.7 Numerical Results for the Kawasaki Representation	194
7.8 The Van Kampen Objection to Linear Response Theory	198
References	207
8. Time Dependent Response Theory	209
8.1 Introduction	209
8.2 Time Evolution of Phase Variables	209
8.3 The Inverse Theorem	211
8.4 The Associative Law and Composition Theorem	214
8.5 Time Evolution of the Distribution Function	216
8.6 Time Ordered Exponentials	217
8.7 Schrödinger and Heisenberg Representations	218
8.8 The Dyson Equation	220
8.9 Relation Between p - and f - Propagators	221
8.10 Time Dependent Response Theory	223
8.11 Renormalisation	226
8.12 Discussion	228
References	229
9. Steady State Fluctuations	231
9.1 Introduction	231
9.2 The Specific Heat	232
9.3 The Compressibility and Isobaric Specific Heat	237
9.4 Differential Susceptibility	239
9.5 The Inverse Burnett Coefficients	242
References	244

10. Towards a Thermodynamics of Steady States	245
10.1 Introduction	245
10.2 Chaotic Dynamical Systems	247
10.3 The Characterization of Chaos	258
10.4 Chaos in Planar Couette Flow	267
10.5 Green's Expansion for the Entropy	281
References	291
Index	295
